I currently enjoy this whole process of working my way up to becoming a full stack web developer. It has been challenging but also exciting as i'm someone who learns faster and better by repeated practice working on real projects compared to the theoretical way some people may be fond of.

Looking forward to an exciting career in web development!

Technical Skills

Likes: r reactjs redux html css node.js mongodb rstudio gfortran github github-pages bootstrap-4 javascript

Experience

Web developer (Internship) – UX Solutions

Jul 2020 → Current

Part of the project team for designing client sites according to specifications and designs from the UX designer. My specialty for now is front-end although I have plans go full stack in future.

Field Service Engineer – Mobax Telecomms

2017 → 2018

bash, powershell, xterm, cmd, linux

Technical Site Survey of potential microwave radios. Network maintenance and troubleshooting.

Certifications

JavaScript Algorithms and Data Structures –

Jan 2020 → Current

<https://www.freecodecamp.org/certification/fort3/javascript-algorithms-and-data-structures>
javascript, oop, ecmascript-6

Responsive Web Design – <https://www.freecodecamp.org/certification/fort3/responsive-web-design>

Nov 2019 → Current

html, css

Projects & Interests

Portfolio – <https://github.com/fort3/Portfolio>

Jul 2020 → Current

html, css, jquery, bootstrap-4

source files for my portfolio

fort3/numerical_alg – https://github.com/fort3/numerical_alg

Apr 2019 → Current

An idea for solving a given numerical integration using 3 methods. Trapezoid method, Romberg algorithm matrix and a Newton Cotes 4-point Simpson's Rule method

Apps & Software

Unyime_Abasi farms – <http://fort3.github.io/unyime-abasi/>

Jul 2020

html, bootstrap-4, css

An initial frontend draft for an agricultural company based in Nigeria.

Portfolio – <http://fort3.github.io/Portfolio/>

Jul 2020

Calibom – <http://calibom.netlify.app>

May 2020

html, css, reactjs, bootstrap-4

Deployed app on netlify of a project in progress.

QuoteApp – <http://fort3.github.io/quoteApp>

May 2020

reactjs, github, github-pages

Deployment of previously designed random quote generator app using the GitHub pages feature and create-react-app framework.

My React Markdown Previewer – <https://codepen.io/fort3/pen/qBELVRQ>
reactjs, bootstrap-4, css, html, babel, react-dom

Jan 2020

This is another project required to complete the frontend libraries certification part at free code camp for the full stack cert package. It's a simple previewer for creating markdown and you see your updates being implemented as you work on the editor.

Random Quote Machine with React and front-end frameworks – <https://codepen.io/fort3/pen/ZEYqJpE>
reactjs, react-dom, bootstrap-4, css, babel, html

Jan 2020

This is just a simple random quote machine I created using frontend libraries like react and bootstrap with basic responsive web design technologies like css and html. This is part of an ongoing course at free code camp for the front end libraries certification part of the whole full stack cert package.
